KENYA VARSITY ESPORTS (KVE)
TEAM STRUCTURE & DEVELOPMENT REQUIREMENTS

Kenya Varsity Esports (KVE) is committed to building a strong, sustainable, and professional esports ecosystem across higher learning institutions in Kenya, including Universities, Colleges, and Technical and Vocational Education and Training (TVET) institutions.

As esports continue to gain national and global recognition, institutions are expected to establish internal structures that support student gamers, promote accountability, and enable long-term development.

To support this vision, the following requirements apply to all higher institutions seeking to participate actively in the KVE ecosystem, tournaments, and future opportunities.

1. Formation of Official Esports Teams

Each participating higher institution (University, College, or TVET) must establish an officially recognized esports team with the following leadership structure:

- Team Captain
- Vice-Captain
- Treasurer
- Lecturer in Charge / Sports Director (Team Patron)

All office bearers must sign and formally agree to their roles and responsibilities.

This structure ensures accountability, proper coordination, and effective communication between students, Kenya Varsity Esports, and institutional administration.

2. Minimum Membership Requirement

(Institutions may introduce an internal membership fee if they wish; this is optional.)

Each institution's esports team must consist of a minimum of 20 active members, representing major competitive gaming titles commonly played in Kenya, including but not limited to:

- PUBG Mobile
- eFootball Mobile
- Call of Duty Mobile
- EA FC
- Fighting Games (Tekken / Mortal Kombat)
- Other relevant competitive titles

Each title may appoint a Sub-Captain to assist the Esports Captain in coordination, communication, and performance monitoring.

3. Internal Institutional Esports Event Requirement

Each institution must host at least one internal esports event annually, organized primarily by students, to promote esports culture and leadership development.

Suggested Implementation:

- Integrate esports events into inter-school or inter-faculty activities.
- Host an internal tournament in any preferred competitive title.
- Introduce ticketing where proceeds support esports development within the institution.
- Invite Kenya Varsity Esports to attend, support, document, or promote the event.

4. Participation Fees, Prize Pool & Operational Costs

Participation Fee

- Each registered squad/team shall pay a participation fee of KES 5,000 per competition.

Fee Allocation

The participation fee will be split as follows:

- 50% allocated to the prize pool
- 50% allocated to operational costs

Operational costs include, but are not limited to, tournament administration, production, logistics, officiating, broadcasting, staffing, and ecosystem development.

Example Scenario

If 50 teams/squads register for a competition:

- Total collected: KES 250,000
- Prize Pool (50%): KES 125,000
- Operational Costs (50%): KES 125,000

(Figures may scale depending on the number of registered teams.)

Future Subscription Model (Planned)

Kenya Varsity Esports plans to transition to an annual subscription model, where:

- Members or institutions pay a yearly subscription fee
- Subscribed members may register multiple teams across different titles without paying per-squad participation fees
- This model is designed to promote affordability, sustainability, and broader participation

Further details will be communicated prior to implementation.

5. Transportation & Accommodation Responsibility

All transportation, accommodation, and related logistical arrangements for teams participating in physical or hybrid events shall be the responsibility of the institutional esports club.

Clubs are required to:

- Liaise with their Sports Director, Lecturer in Charge, or Team Patron
- Coordinate approvals, travel plans, and accommodation where necessary
- Ensure player welfare and institutional compliance during events

Kenya Varsity Esports will communicate event venues and schedules in advance to allow institutions adequate planning time.

6. Opportunities for Students After Graduation

Kenya Varsity Esports is committed to developing future esports professionals.

Students who demonstrate leadership, commitment, and strong organizational skills through team management and internal event execution may be considered for part-time or developmental roles within the KVE and Tunza Esports ecosystem after graduation.

7. Purpose of These Requirements

These requirements are designed to:

- Encourage institutional ownership of esports development
- Establish structured esports teams comparable to traditional sports clubs
- Promote wide participation across multiple competitive titles
- Strengthen leadership, governance, and event management capacity
- Build a sustainable pipeline of future esports leaders and professionals

Conclusion

Kenya Varsity Esports values collaboration with Universities, Colleges, TVETs, Sports Directors, and student leaders nationwide. By implementing these requirements, varsity esports in Kenya will become more organized, competitive, and impactful.

We look forward to working with your institution as you establish or strengthen your esports team.
